## Wash and Seal SPECIAL

### 10% Off Wash and Seal Service

We provide a wash and seal service that will eliminate many concrete problems but will not change the appearance or the texture of the surface. Check out this awesome video of our cool cleaning part, click [here](#) to watch.

We will make your concrete easier to clean - it is salt, UV and stain resistant. We will make

sure to seal your surface keeping the weather conditions from further damaging your concrete!

Call us today 219.765.3690!

## Support Officer Joe Pacheco / May 20 Event (Munster, IN)

Officer Joe Pacheco has been diagnosed with stage IV, aggressive, inoperable, malignant brain tumor in December 2016.

Joe is the husband of 15 years to his wife Chaz and doting father of Breanna and Dylan. He is also a loving son, brother, nephew, uncle and friend to many.

Officer Joe is an 11-year veteran of the Munster Police Department and currently serves as our department's School Resource Officer at Munster High School, is a member of the Honor Guard and supervises the Munster Police Explorers Program. Officer Joe has received numerous awards and commendations during his years of service to the community of Munster. Please join us in supporting Joe and his family during his time of need by participating in a fundraiser activity and/or donating to one of the listed accounts below.

There is a major event YOU WILL NOT WANT TO MISS planned for May 20th at the Center for Visual and Performing Arts, tickets are available by advance purchase at the Griffith Police Station (115 North Broad Street, Griffith, Indiana) for \$35.00. There will be food, entertainment, raffles, silent auctions, 50/50. etc. All proceeds go to Officer Joe Pacheco and his family.

- 1) Peoples Bank Account: Officer Joe Pacheco (Munster, IN Branch)
- 2) GoFundMe Campaign Title: "Joe's Biggest Race" click [here](#) for a link to that campaign.

Thank you in advance for your support of Joe and his family! We look forward to seeing you May 20th for the event!

## Spring Cleaning Can Mean Great Donations!

### ReStore and Reuse!

When everyone is doing their spring cleaning Habitat for Humanity ReStore will accept your donations of new and gently used items people no longer want! Items such as, furniture, appliances, doors, windows, lawn and garden, and building materials. Their ReStore is a great home improvement store at a fraction of the retail cost. Every donation is a tax write off! Click [here](#) here to visit their website.

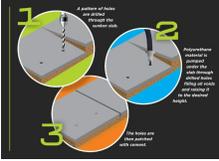

They also have trucks that will come to your house / office and pick up your items! Call 219-972-3000 to schedule a pick up or drop off at our Griffith or Merrillville locations.

## How Do We Lift Concrete Using Polyurethane Foam?

Level Rite Concrete Lifting process is similar to mudjacking, but is an

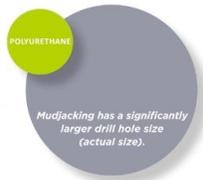

evolved application that allows us to provide our clients with a clean, quick, long-lasting solution. Our process effectively stabilizes soils, fills all voids and lifts concrete using high-density polyurethane foam. The following are the steps for Level Rite Concrete Lifting process:

1. Once the area has been estimated and the scope of the job identified, our technician can safely and confidently drill a series of access points in the affected area. These access points are small, 5/8 inch drill holes that allows the polyurethane foam to be injected under the concrete.
2. Specially designed ports are securely attached to the access points. Enclosed inside a mobile unit is one of our pressurized systems designed for the injection of polyurethane foam. Attached to the unit is a heated hose that securely attaches to the small access ports.
3. The polyurethane foam is injected through the ports crawling deep into loose soil base. Moving laterally underneath the slab. The expanding foam stabilizes loose soils and fills all subsurface voids. Crews carefully monitor the process to insure a safe and effective lift.
4. Once the sunken concrete has been leveled and stabilized the access points are removed and the holes are patched with a concrete mix and area is ready for use.
5. Upon job completion you receive a 1 year warranty against settling so you can hire us with confidence. Click [here](#) to view some picture examples of jobs before and after work.

## Polyurethane vs. Mudjacking: What is the difference?

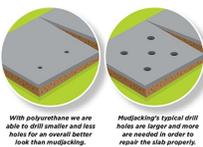

There are a few slabjack methods to choose for completing a concrete raising project. Mudjacking is the oldest and most commonly known process for lifting and leveling concrete. Raising concrete with polyurethane foam injections, also known as foam jacking or poly jacking, is a reliable alternative to mudjacking. There are several advantages to lifting and leveling concrete with polyurethane foam vs. mudjacking.

With polyurethane foam, we are able to use smaller drill holes than what is required with traditional slabjacking methods. Level Rite Concrete Lifting uses small 5/8 inch (dime-size) drill holes to complete our concrete raising projects while mudjacking uses 1-2 inches drill size holes.

---

---

## Polyurethane Foam Is Lightweight!

Polyurethane foam is a light weight material compared to traditional mudjacking slurry (2-6 pounds of polyurethane foam vs. 100-130 pounds of mud slurry). Because of the light weight properties of our foam, it won't burden the underlying soils which are often loose and poorly compacted. Mud slurry is extremely heavy and within a couple years can compact the

loose soil base causing resettlement. Polyurethane foam is the way to go! Click [here](#) to learn about the benefits of foam injection.
