Greetings!

Welcome to our Level Rite Concrete newsletter! You have a front seat with our news and developments which relate to concrete lifting and clean & seal service. Plus exciting happenings in our communities.

Ever think about the weight of mud? Well, we do all the time. A mud slurry is heavy in weight and while it has some cement properties in it, it will further compact the sub base and will shrink over time. Level Rite Concrete uses a super efficient polyurethane foam. It is light weight material that is super durable for lifting uneven concrete. Read below in our feature article on the weight of Polyurethane foam vs. Mudjacking materials.

Awesome sale still happening: 10% off special on Clean & Seal service! I know you want to protect your driveway vs. completely replacing it. Looking for some curb appeal and be the envy of your neighbors? Read below to learn all about our Clean and Seal special. You will want to get on our schedule to protect your concrete this Summer! Call us today for a free estimate, 219.765.3690

The Times Best of the Region '17

Best of the Region

We are honored to be called #1 in the Concrete Repair Category! Thank you to all who have voted for us. How exciting! Last Sunday, May 21, The Times Media Company (Northwest Indiana Times Newspaper) announced various winners in many different categories. We are humbled to be ranked #1 and will continue to work every day to keep that ranking with our customers.

Check out this great story from the NWI Times, click [here](#).

Polyurethane vs. Mudjacking Materials Weight

Polyurethane Foam vs. Mudjacking:

There are a few slabjack methods to choose for completing a concrete raising project. Mudjacking is the oldest and most commonly known process for lifting and leveling concrete. Raising concrete with polyurethane foam injections, also known as foam jacking or poly jacking, is a reliable alternative to mudjacking. Level Rite Concrete uses polyurethane foam to raise uneven concrete. There are several advantages to lifting and leveling concrete with polyurethane foam vs. mudjacking.

Smaller Holes:

With polyurethane foam, we are able to use smaller drill holes than what is required with traditional slabjacking methods. Level Rite Concrete uses small, 5/8 inch (the size of a dime \$.10 piece) drill holes to complete our concrete raising projects.

Level Rite Concrete: 5/8 inch vs. Mudjacking: 1 inch - 2 inch

Polyurethane Foam Is Lightweight:

Polyurethane foam is a light weight material compared to traditional mudjacking slurry (2 pounds of polyurethane foam vs. 100 pounds of mud slurry). Because of the light weight properties of our foam, it won't burden the underlying soils which are often loose and poorly compacted. Mud slurry is extremely heavy and within a couple years can compact the loose soil base causing resettlement.

Fewer Holes:

With foam, fewer holes are drilled in your concrete for a cleaner look compared to mudjacking. Because polyurethane foam enters the soil base as a highly pressurized liquid, we can achieve a large coverage area from each injection site. Our polyurethane foam can flow and expand anywhere from 4 to 15 feet from each injection site. Because of the heavy nature of mud slurry only 1-2 feet of coverage should be expected from each drill hole. As a result, 50%-75% more holes are needed to repair sunken concrete with mudjacking.

Long Term Repair:

Lifting settled concrete with polyurethane foam is considered a long-term repair, not a temporary fix. Our lightweight high-density foams won't lose density like mudjacking slurry. Our hydrophobic foams cure in 15 minutes and will completely maintain their compressive strength. Also, our foams won't break down or washout with from water, making the Level Rite Concrete process a long-term solution.

Clean and Seal SPECIAL

10% Off Clean and Seal Service

Find out what many already know, Level Rite Concrete can clean and seal your concrete! We use a sealer that will protect your

concrete surfaces from the effects of exposure that cause the damage: severe conditions like rainwater, repeated melting and freezing, and road salts, or de-icers. We will seal the surface, and infiltrate the pores of the concrete, keeping these conditions from further damaging your concrete. This product will eliminate many concrete problems, but will not change the appearance or the texture of the surface. It also will not discolor the concrete, or cause it to be slippery. Your concrete will be easier to clean, is salt, UV resistant, and it's environmentally responsible. Call us today 219.765.3690! Click [here](#) to learn about our cleaning and sealing service!

June Happenings

Appearances Schedule

We love getting out and meeting our customers. Please come visit with us at:

- June 4: Munster Farmer's Market 8 AM - 2 PM
- June 25: St. John's Farmer's Market 8 AM - 1 PM

Plan to shop local artisans and visit with great vendors, listen to some music and enjoy some great food! We look forward to meeting you!

Police & Fire Charity Softball Tournament (Munster, IN)

June 11, 5th Annual Event

The Police & Fire Charity Softball Event between Munster, Highland, Dyer and Lansing police & fire departments is happening Sunday, June 11.

Please plan to join us for an afternoon of softball, door prizes, music, face painting and bounce houses. Tickets are \$5.00 at the door. Event begins 1:30 PM. We appreciate everyone's participation along with the support of communities. Come out for a great time. All proceeds will benefit Officer Joe Pacheco. Joe was diagnosed with brain cancer this past January and is married with two young children. Thank you in advance for your support.

Thank You For Your Business!

**We totally love our customers!
Thank you for being so awesome!**
