Greetings!

Welcome to our Level Rite Concrete newsletter! You have a front seat with our news and developments which relate to concrete lifting and clean & seal service. Plus exciting happenings in our communities.

Why does concrete sink? It's an age old question that still applies today! Read below in our feature article on the why's and the solution you can use to repair your uneven concrete. Remember, it's a fraction of the cost of full replacement. Call us today for a free estimate, 219.765.3690.

Spa Day For Your Concrete? I know you want to protect your driveway vs. completely replacing it. Looking for some curb appeal and want to be the envy of your neighbors? Call us now for an estimate on our Clean and Seal service. You will love your clean concrete! Call us today for a free estimate, 219.765.3690 and as luck would have it, we are still running our 10% off special because it's so popular!

Why Does Concrete Sink?

Level Rite Concrete is a locally owned company based in Munster, IN. We provide residential and commercial customers with a better solution to concrete raising vs using the mudjacking method. Level Rite Concrete uses a state-of-the-art Polyurethane

foam injection material as opposed to the traditional mudjacking slurry. Joe is the expert in doing the work. Pictured here is Joe, working on a patio repair! Our concrete raising solution is a cost effective, eco-friendly, time-saving alternative to traditional mudjacking. With our Polyurethane Foam, you won't have to raise your concrete again!

Why does concrete sink?

Concrete will sink as the soil underneath a piece of concrete, either compacts (the water in the soil has evaporated to the point that it has shrunken) or a void or pocket has been created due to erosion from running water (from a down spout or a natural sloping of the ground toward your cement) or rainwater, causing a concrete sidewalk, driveway, patio, or porch to sink, settle or become uneven. When we experience less rain or moisture, the water in the soil evaporates which dries the soil causing the cement to sink into the ground, many times in an uneven way. Winter snow and ice can be especially problematic for our area and sinking concrete. Make sure when the ground thaws that you check your driveway and sidewalks for gaps between the concrete slabs. If you think you may have an issue with sinking concrete, call us. The sooner you call us the more cost effective our visit can be!

What is Mudjacking?

Traditional mudjacking also referred to as 'slab jacking', is a process of raising a section of concrete by drilling many holes approximately 1-2" wide in the concrete and pumping a mixture of clean fill dirt, water and cement through the holes effectively pushing the concrete up from below. Traditional materials can weigh 100-120 lbs. per cubic foot. Once the cement is lifted, the holes are patched.

Concrete Repair with Polyurethane Foam:

Polyurethane foam leveling is a two-part process where a polyurethane foam is injected through holes in the concrete. Our hole size is 5/8" in diameter. The concrete is effectively raised with the expansion of the foam. The foam material will expand in weak soil first to consolidate and cause the dirt to become denser and fill all voids below the concrete. It expands in all directions (moves laterally underneath the slab), sometimes as much as 7 feet, so fewer holes are needed to raise the concrete. The foam is set in 15 minutes. Our polyurethane foam method will not retain moisture so it is not subject to erosion once it is set. Polyurethane foam does not settle due to its lightweight nature. Foam weighs 3-8 pounds per cubic foot. The small holes are patched.

Why choose us over Mudjacking?

- We guarantee our work!
- Many of our jobs are repairing the concrete where traditional mudjacking failed. Which means, you paid twice to have the job done right!
- We are good for the environment. Our polyurethane foam filling product is made from recycled materials.
- Have you been told you need to replace your concrete? Why replace your good concrete when you can raise your concrete with an eco-friendly product from a local Northwest Indiana company? That's all we do. We lift concrete. We specialize in concrete repair for your driveway, sidewalk, patio, pool deck or garage floor, etc.

Benefits of Foam Jacking Concrete Repair:

- Weighs Less: Polyurethane foam weighs less per cubic foot than mudjacking.
- Less Cost. 50%-70% less than concrete replacement costs.
- Less Invasive. We don't tear up your lawn and you won't need to reseed. No heavy equipment needed.
- Less Mess. There is no water/mud mess to clean up.

- Less Time: We get the job done in hours and not days or weeks! Not as noisy and takes less people to accomplish (less labor costs).
- Waterproof: resists erosion! No more settling! Foam won't shrink over time.
- We can work in smaller spaces. We can work on sidewalks between buildings and driveways that are next to one another in a condo, duplex or apartment complex.
- Eco-Friendly: our product is high tech and made from recycled materials.

When should you call us?

You can call us anytime! We can use our high-tech polyurethane foam and repair your concrete until the ground freezes and as soon as it thaws! On average, we can give you an estimate within 7 business days. We won't stand you up and we won't take a deposit. (You won't believe the stories we've heard about unfinished work and lost money. Unbelievable!) We have an impeccable reputation, a commitment to excellence and we plan on keeping it that way. Clean and Seal SPECIAL

Spa Day For Your Concrete

Find out what many already know, Level Rite Concrete can clean and seal your concrete! We use a sealer that will protect your concrete surfaces from the effects of exposure that cause the damage: severe conditions like rainwater, repeated melting and freezing, and road salts, or de-icers. We are offering 10% off now.

Look at this feature picture, the driveway on the left has been cleaned and sealed. The driveway on the right has not. Think about it just raining (as it did that morning we took the picture) wouldn't you want a sealed driveway like on the left? The water just beads on top of it. Rather than the rainwater penetrating into the unsealed concrete.

We will seal the surface, and infiltrate the pores of the concrete, keeping these conditions from further damaging your concrete. This product will eliminate many concrete problems.

- It will not change the appearance of your concrete
- It will not cause it to be slippery

Your concrete will be easier to clean, is salt, UV resistant, and it's environmentally responsible.

Call us today 219.765.3690! Click [here](#) to learn about our cleaning and sealing service!

July Happenings

Appearances Schedule

We love getting out and meeting our customers. Please come visit:

- July 2: Lowell Summerfest Car Show 8 AM - 3 PM
- July 3: Highland In Twilight Parade 6:30 PM
- July 4: Munster 4th of July Parade 2 PM
- July 9: Munster Farmer's Market 8 AM - 2 PM

- July 16: St. John's Farmer's Market 8 AM - 1 PM
- July 30: St. John's Farmer's Market 8 AM - 1 PM

Plan to shop local artisans and visit with great vendors, listen to some music and enjoy some great food! We look forward to seeing you!

AND Who doesn't love a parade? Join us for two parade appearances, I hear there may be bubbles involved...

The Times Best of the Region '17

Best of the Region

We are honored to be called #1 in the Concrete Repair Category! Thank you to all who have voted for us. How exciting! Sunday, May 21, The Times Media Company (Northwest Indiana Times Newspaper) announced various winners in many different categories. We are humbled to be ranked #1 and will continue to work every day to keep that ranking with our customers.

The newspaper incorrectly stated our phone number, please call us today at 219.765.3690.

Also, check out this great story from the NWI Times, click [here](#).

Thank You For Your Business!

We totally love our customers!
Thank you for being so awesome!

For a chance to WIN this month's giveaway... Please leave a testimonial about our work on Facebook. Click [here](#) to leave a review . We appreciate your comments!

Thank you for joining us for our newsletter. We appreciate YOU! TALK TO US! We welcome your comments and suggestions at any time!

Please help us spread the word - by forwarding this email to your family and friends. There is an easy link below.

We love our fans! Please remember to **LIKE** us on [Facebook](#), **FOLLOW** us on [Twitter](#) and **CONNECT** with us on [Google+](#).

Have an awesome day!

Sincerely,
